

# Supporting the engagement and participation

WORKSHOP ON THURSDAY 24<sup>th</sup> SEPTEMBER

There will be three workgroups each with a different point of view

- A. Student
- B. Teacher
- C. Institute

Each workgroup makes a **mind map** based on their point of view thus creating a "new" perspective on the theme that they have already handled in their homework.

The focus should be on these four aspects

- Curriculum/curricula
- Learning environments
- National/international cooperation
- Possible other methods/tools

After assembling the mind map each workgroup makes a short summary about their work and achievements during the workshop.

The mind maps shall be digitalized and used later on for the hand book.
